

MET EDM 8870

Synthetic EDM Fluid

Product Description:

MET EDM 8870 is a clear, high-purity synthetic Electrical Discharge Machining fluid that has a high dielectric strength and oxidation resistance to give maximum performance and fluid life. It is free of aromatic, so it is virtually odorless and ideal for employee safety, and the high flash point limits fire risks. The low viscosity of **MET EDM 8870** allows for rapid settling of particles, which in turn are removed by filtration for clear viewing of the work piece and increased production.

Benefits:

- Clear Liquid
- Low Viscosity
- Odorless
- Excellent Oxidation Properties
- High Flash Point
- Low Skin Sensitivity

Typical Product Properties:

| Test | Results |
|--|-----------|
| API Gravity | 48.7 |
| Viscosity @ 40°C, cSt | 2.9 |
| Flash Point, °C (°F) | 130 (266) |
| Distillation, Initial Boiling Point, °C (°F) | 275 (527) |
| Distillation, Final Boiling Point, °C (°F) | 305 (581) |
| Density @15.6°C (60°F) | 0.785 |

The Metalloid Partnership Advantage

We believe the statements, technical information and recommendations contained herein are reliable, but they are given without warranty or guarantee of any kind, expressed or implied, and we assume no responsibility for loss, damage, or expense, direct or consequential, arising out of their use.

No one understands metalworking fluids better than Metalloid, so no one else can bring you advanced technology that works on the issues that matter to you. Get the whole story by calling Metalloid at **800.686.3201** or visit us at www.metalloidcorp.com
