

## The Green Technology Partnership That Works!

Your Single Source Supplier For Metalworking Fluids.

## Metalloid Corporation

Formulating, Manufacturing, and Marketing Metalworking Fluids to a Broad Spectrum of Industries Since 1951.

**Your Partner in  
Cutting Edge Lubricant  
Technology for the  
Metalworking Industry.**

Metalloid understands how to troubleshoot difficult processes and optimize performance economically and consistently. We achieve this by providing service on-site or through our total systems monitoring program supported by our metalworking laboratory team. This systems approach provides our partners with the means to reduce overall costs in three key areas: Chemical, Labor and Disposal, while simultaneously optimizing process control in all systems.

Metalworking industries require high quality, specialized technology to address specific demands. Metalloid's focus is to provide safe, non-hazardous lubricant solutions. We are a full-line manufacturer that understands the overall process in terms of not only providing a custom formulated lubricant, but the cleaner to remove it and the corrosion inhibitor to protect the part.

You are in the business of  
manufacturing world class parts!  
**We Understand This!**

What if you did not have to  
concern yourself with the daily  
production challenges as result of  
fluid control?

The proper selection and application of metalworking fluids can result in increased productivity, reduced waste, less down time, and lower cost in your manufacturing operation.

**We Understand This!**

## Industries Served

- |                    |                        |
|--------------------|------------------------|
| Aerospace          | Automotive             |
| Firearm/Sportsman  | Heavy Equipment        |
| HVAC               | Machining              |
| Medical            | Tube Manufacturing     |
| Wire Manufacturing | Additive Manufacturing |

## Profitable Partnerships Start with Superior Products.

You are in the business to manufacture world class parts and increase profitability!

### We Understand This!

- You don't want to stop machines due to fluid issues.
- You want to maintain adequate inventory without capital tie-up.
- It is difficult to maintain consistency between multiple plants.
- You are always looking for competitive pricing.
- You want to provide a safe and healthy facility for your workers.

### Your Solution

Metalloid offers quality products formulated with attention to productivity, environment, and employee health and safety. Continuous cutting-edge research and development enables Metalloid to respond to the changing demands of the metalworking industry with diverse product-lines designed to increase productivity and profitability. Metalloid will provide you with a "Flex Pricing Program," to insure consistent pricing opportunities.

## Strong Partnerships Deliver Innovation and Collaboration.

We are in the business to supply innovative, environmentally friendly metalworking fluids, and unparalleled support!

### The Metalloid Partnership Advantage

- Total systems approach customized to YOUR manufacturing processes.
- On-site training in fluid system control that manages waste and extends fluid life.
- Laboratory support comprising over 150 years of combined experience providing state-of-the-art fluid control and problem solving.
- Inventory control solutions that reduce YOUR costs and improve YOUR profitability.

Metalloid's team of experienced chemists, sales professionals, and other internal support personnel provide our partners with the assurance that we are working FOR YOU! Our laboratory testing and screening technology insures the right product(s) are matched with your processes to ultimately meet your manufacturing needs, create consistency in your operation, and increase your profitability.

Metalloid believes that through the use of Green Technology, industry, people, and the environment will co-exist and prosper. Our product development efforts, now and in the future are focused on utilizing raw materials and services that address our commitment to the environment.
